## ABOUT THE REVA UNIVERSITY, INDIA

REVA University has been established under the REVA University Act, 2012. The University is located in Bengaluru on a sprawling green campus, spread over 45 acres of land, built with state-of-the-art infrastructure creating an environment conducive to higher learning and research. The founders of REVA University believe in the motto "Knowledge is Power". Driven with a philanthropic vision and a missionary zeal. The campus is built to transform students into outstanding citizens. The University prides itself in contributing to the holistic development of every student. The University currently offers 32 Undergraduate Programmes, 25 full-time Postgraduate Programmes, 2 part-time Postgraduate Programmes, Ph.D. Programmes in various disciplines and several Certificate / Diploma and Postgraduate Diploma Programmes in Engineering, Architecture, Science and Technology, Commerce, Management Studies Law, Arts & Humanities, and Performing Arts. The programmes offered by REVA University are well planned and designed based on in-depth analysis and research with emphasis on knowledge assimilation, practical applications, hands-on training, global and industrial relevance, and social significance.

## ABOUT THE SCHOOL

The School of Civil Engineering is headed by highly experienced Professor and is supported by well qualified faculty members. The school has state-of-the-art class rooms and well-equipped laboratories. It offers B. Tech in Civil Engineering and M. Tech programs in Computer Aided Structural Engineering, Transportation Engineering & Management and Concrete Technology & Management, in addition to one-year certification courses in various streams.

The school also has research program leading to doctoral degree. The curriculum of both graduate and postgraduate degree programs have been designed to bridge the gap between industry – academia and hence they are industry application oriented. Civil Engineering teaching was limited to planning, analysis, design and execution of different types of infrastructure like buildings, roads, bridges, dams and power plants. However currently, due to increase of technological sophistication and demand for higher living standards geared up by economic growth and concerns about environmental impact have changed the scope of Civil Engineering. The REVA University would

like to offer Civil Engineering Programme to produce quality engineers who are effective and efficient in problem solving and providing economical and sustainable infrastructural solutions.

## SCOPE

The conference will have plenary lectures followed by parallel sessions. Plenary lectures will be delivered by eminent personalities of repute to introduce the theme of the conference. Conference is to provide a platform to Researchers, Young aspiring Engineers, Academicians & Postgraduate students, to present their research findings of their respective domains of knowledge and share ideas and views.
