

## CRISES OF HUMANITY IN THE GLOBAL ECONOMY (ALL OF US ARE AT RISK IN THE WORLD AROUND US)

CHETTIAR ARUNACHALAM & BRUCE B. CLARK

Ex- Dean, Principal, Professor of Pune, Mumbai, Delhi and Sardar Patel University, India

Kindness is the Language which the Deaf can Hear and the Blind can See. – Mark Twain

Bruce B. Clark<sup>i</sup> writes-

Ignorance is dangerous, but knowledge without responsibility is more dangerous.

### ABSTRACT

There are many crises of humanity like food<sup>ii</sup>, debt<sup>iii</sup>, economic<sup>iv</sup> recession<sup>v</sup>, war, refugee & migration, displacement, underdevelopment, climate change, natural & unnatural disasters, arising out of growing transnational crime, house<sup>vi</sup>, those living in conflict and in chronic poverty<sup>vii</sup>, most vulnerable, growing transnational crime, inequality<sup>viii</sup>, global fiscal policies that negatively impact other economics, nuclear trafficking & terrorism, human rights violations, policy crisis<sup>ix</sup>, Marx's theory of economic crisis -its causes & impacts<sup>x</sup>. Expanding lists at risk is infinite. In crises, thousands have been died and others' are suffering. Building on the earlier works on humanity & globalization, this study discusses the nature of the global economy, the rise of a globalized production and financial system, a transnational capitalist class, and a transnational state and warns of the rise of a global police state to contain the explosive contradictions of a global capitalist system that is crisis-ridden and out of control<sup>xi</sup> by giving rise to all kinds crises of `artificial intelligent weapons (AI)<sup>xii</sup>, climate change, financial market volatility, increasing inequality, chronic poverty<sup>xiii</sup>, global slavery<sup>xiv</sup>, trafficking & terrorist, defining vulnerability, and some more to add to the urgency of seeking connections between crises of humanity and the global economy. As a result of more warring parties are brazenly violating international standard to recognise others as the common humanity and the suffering people are not "others"; they are as diverse as the human family itself; the developing countries pay the highest price in a global economy. These reasons and more, this study surveys some of the factors under study and conclude with an exploration of how diverse social, economic & political forces are responding to the crisis of humanity and alternative scenarios for the future.

**KEYWORDS:** Crises of Humanity in the Global Economy
