ABSTRACT

This report evaluates all the factors of construction industry, known as socio-economic factors in developing countries. The drastic influences of such factors are grouped together, and structured a questionnaire. This questionnaire survey was conducted with 70 various respondents like Project Manager, Project Coordinates, Contractors and Architects, in which, 51 questionnaires have been retrieved analyzed by The Relative Importance Index (RII) method. The aim of this paper is to evaluate the socio-economic factors and their influences in construction industry of developing countries.

KEYWORDS: Economic Development, Construction Industry Development, Developing Nation
